

Questions for follow up from Second public hearing January 26, 2016

1. PUD intent: Does a developer include all the owned acres when figuring out how many units can be built? Can the developer include wetlands acreage for example.

The Wildlife overlay makes more sense with the PUD where the development is closer to the road and the supporting infrastructure.

2. Telecommunications: is intent to regulate any communication tower/structure equally that is not personal. Staley: regulate other towers under Commercial rules. If there is nothing in the regulations then it is not allowed. Who regulates TV and radio towers?

Include all communication towers.
